Sangamesh Karadagi

Full Stack Developer

+91-8123952878 | saish.v.karadagi@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

Aspiring Full Stack Developer with strong foundations in computer science and hands-on experience in MERN, Next.js, and AI-driven applications. Passionate about building scalable, user-focused solutions and recognized for leadership, adaptability, and problem-solving mindset.

Education

S.G. Balekundri Institute of Technology CGPA: **8.29**/10

B.E in Computer Science and Business Systems *2022 – 2026*

- Relevant Coursework: Data Structures & Algorithms, DBMS, Web Development, Software Engineering
- Academic Achievement: Consistently maintaining position in top **10%** of the class

Experience

Transdisciplinary Research Trainee Feb 2025 – Present

SGBIT Innovation Cell in collaboration with TLS *Belagavi*

- Selected for cross-disciplinary research program addressing SDG-aligned challenges using systems thinking and design methods
- Working with diverse teams to prototype solutions and apply CSBS principles to real-world problem framing

Technical Club President Dec 2024 – Present

S.G. Balekundri Institute of Technology *Belagavi*

- Leading **100+** students to drive tech learning via **10+** workshops, hackathons, and hands-on sessions
- Aligning activities with real-world tech trends while promoting collaboration, mentorship, and innovation culture

Projects

Aarthik Sakhi (AI-powered Financial Platform) | *Next.js, Node.js, Express.js, MongoDB, OpenAI APIs*

GitHub Repository

- Built an AI-driven financial platform designed for rural, urban women and first-time financial users in India
- Developed features like voice-enabled education and community support
- Ensured accessibility with local language support, responsive design, and smooth backend integration using Node.js and Express.js

XAI-Enabled Fraud Detection System | *Python, Scikit-learn, SHAP, LIME*

GitHub Repository

- Designed fraud detection system using Random Forest and Isolation Forest, enhanced with SMOTE for balanced datasets
- Integrated Explainable AI techniques (SHAP, LIME) for interpretable insights, improving trust and transparency

SGBIT IntelliHub – Academic Ecosystem Platform | *MERN Stack, Tailwind CSS*

GitHub Repository

- Developed dual-component platform featuring responsive college website integrated with full-stack ERP portal
- Built secure MERN-based system using JWT authentication for **3** user roles with **15+** reusable UI components
- Structured scalable MongoDB schema with **10+** collections enabling efficient data handling and real-time updates
- The **CSBS department of S.G. Balekundri Institute of Technology, Belagavi** has proposed requirements for this platform, and the extended version of this project is currently in development

Technical Skills

Programming Languages: C++, Python, Java, JavaScript
Frontend Development: React.js, HTML5, CSS3, Tailwind CSS, Figma
Backend Development: Node.js, Express.js, RESTful APIs
Database & Tools: MongoDB, Git, GitHub, VS Code
CS Fundamentals: DSA, OOPS, DBMS, CN, OS, AI/ML

Achievements

- Tata Imagination Challenge: Ranked in the Top **100** out of **400,000** ideas
- Selected as Technical Club President in recognition of technical expertise and leadership potential
